iPadOS 15

Open Compressed ZIP Files Saved in OneDrive

Currently, the OneDrive app for iPadOS does not support the ability to extract zip files. iPad, does have this functionality via the Files app. These steps will walk through how to connect OneDrive data to the Files app and decompress a zip file. The resulting folder will be saved in the same OneDrive location for consistency and centralized data management.

1. Open the OneDrive app.

2. Navigate to a Zip file.

3. When you tap Options (•••), there is no ability to unzip the file. Continue to the next step.

- 4. Swipe up from the bottom to go back to the Home Screen.
- 5. Open the Files app.
