

Mac Integration Basics 10.13

This Mac Integration Basics 10.13 course is designed to provide students with easy Mac integration knowledge. Organizations are increasingly integrating Mac computers into Windows or other standards-based network environments. This course provides step-by-step instructions for a successful integration.

Who should attend

- Users who bring a Mac into organizations that predominantly use the
- Microsoft Windows operating system and Windows Server Essentials
- Users who replace a Windows computer with a Mac
- IT professionals who support Mac users in organizations that
- Predominantly use Windows and Windows Server Essentials

Objectives

Upon completion of the iOS Deployment Essentials in Education course, students will be able to:

- Integrate a Mac into a Windows network environment.
- Configure a Mac to work with Active Directory.
- Take advantage of network services, file sharing, printing, instant messaging, email, calendars, and contacts.
- Provide security at the user, local-networking, and remote-networking levels.
- Migrate data from a Windows computer to a Mac.
- Back up data.
- Run Windows programs on a Mac.
